9	Institute: SOCIETY FOR DEVELOPMENT STUDIES Course: NINETEENTH ADVANCED COURSE ON NEED ASSESSMENT, MONITORING, EVALUATION AND INFORMATION GENERATION TECHNIQUES FOR DECENTRALISED GOVERNANCE Start Date: 26-06-2017 End Date: 05-08-2017	Context of programme Decentralized governance for improved quality of life has remained the buzzword of government all over the world for over two decades. Several experiments have been carried out in different parts of the world in the context of the local situation, in search for transparent, accountable and inclusive governance. Added to it is the development in the budgetary processes that is getting outcome-oriented, due to a rising demand from the governments, the development agencies and the civil society for unbiased assessment of the impact of the development programmes, requiring diagnostic and demand-driven evaluations for linking them to the budgetary process. A major problem in the process of developing good governance at the sub-national level is the inadequacy in the techniques for assessment of requirements for programme development and monitoring of the development process. Weak convergence of inputs in multi-department and multi-sector programmes has been identified as a major roadblock. Lack of transparency in information flow and absence of participatory decision making process have contributed to this situation. A critical factor that is often ignored is the capacity of the programme initiators to assess consistency between programme objectives and desired programme outcomes. In the above context, it is urgently required for the administrators and programme managers as well as other stakeholders to develop creative management capacity to address the new challenges. Ground level	ALL COUNTRIES	20 / 10	AFGHANISTAN MALDIVES PHILIPPINES TAJIKISTAN TANZANIA

SI No	Course Details	Aim & Objective	Partner Countries	Max Seats / Utilized	Countries Participated
		data and information are critical for initiating an era of effective decentralized governance. New techniques are required to address these systemic issues. This programme seeks to provide capacity building inputs in these directions. India is one of the largest beds for experiments in decentralized governance for about almost three decades, the mandate for which came through the constitution amendment (73rd and 74th) acts in the early nineties Major objectives of the programme are to: 1. Familiarise the participants with the concepts of decentralized governance and the practices. 2. Generate skills to assess crucial development interventions in the context of sub-national governance 3. Develop capacity to assess need-based and demand-driven requirements for sub-national programmes 4. Develop expertise in diagnostic and outcome oriented evaluation and monitoring techniques 5. Equip participants with effective tools for analysis and consequent data generation of outcomes of policies and budgetary implications 6. Create awareness about the imperatives to institutionalize the activities for decentralized governance 7. Provide skills to introduce the participatory process at all stages of planning, programme implementation and management. Outcomes Informed group of officials capable of managing programmes on the principles of decentralized			

SI No	Course Details	Aim & Objective	Partner Countries	Max Seats / Utilized	Countries Participated
		governance. 1. Professional capacity for efficient assessment of local-level demand and design planning and management instruments. 2. Capacity to develop cost-effective information system in a deficient set-up for policy interventions. 3. Capacity to prepare strategic plans of action, with the participation of different stakeholders. 4. Sensitized and trained to establish and operate governance networks.			
10	Institute: NIIT LTD Course: CERTIFICATE COURSE IN VOICE AND ACCENT AND MS-OFFICE SKILLS Start Date: 26-06-2017 End Date: 18-08-2017	This training program is designed for candidates to enhance their voice and accent, a very indispensable soft skill. It would aid the participants to neutralize elements of their speech. Moreover, help them to overcome mother tongue influence (mti). Which in turn would allow them to speak more neutral accent. This training will focus on phonetics and intonation which are the major areas that impact one's accent. Hands on training on ms office for mid level and above. 26	Institute: REC INSTITUTE OF POWER MANAGEMENT & TRAINING Course: SOLAR POWER GENERATION- GRID ENABLING Start Date: 10-07-2017 End Date: 04-08-2017	Aim: electricity has been the backbone infrastructure facility of any country with its manifold applications covering almost every aspect of human life style, resulting in galloping demand requiring huge generating capacity in addition to enough reserve margins in the system. Fuel choice itself is a vital consideration in creating power stations, in as much as, every unit that is generated pollutes the atmosphere further, unless cdm practices and clean and green power generation is resorted to, to the hilt. But non-availability of such fuels in the required quantities, operational constraints leading to poor efficiency and low plant load factor, seasonal generation at high costs, inadvertent supply at voltages beyond the reach of load dispatching are some of the problems associated with clean power technologies, making them unsuitable for firm power supply. Despite the above cited inefficiencies, encouragement to non conventional energy based power plants is essential for safe guarding environment from total degradation. Further, fossil fuel stocks are fast dwindling and there is a need to identify alternative sources of power supply in order to maintain per capita consumption of the humanity. Against this scenario, the solar power plants provide a better opportunity as this source is endless if only the cost of generation can be brought down to affordable level. If adopted on a large scale, by improving the efficiency of the system, the cost of solar power	ALL COUNTRIES	20 / 14	AFGHANISTAN BHUTAN GAMBIA IRAQ KENYA NIGER SOUTH SUDAN SRI LANKA TANZANIA VIETNAM

SI No	Course Details	Aim & Objective	Partner Countries	Max Seats / Utilized	Countries Participated
		generation can be brought down considerably minimizing the effect of green house gases. Many organizations world over are progressing in this direction steadfastly. Objective: 2. To familiarize and create awareness on the methods to calculate the intensity of sunlight and assessment of power generation capabilities 2.To study constraints in the solar power generation and possible remedial measures To discuss operation and maintenance and protective systems of solar power plant			
27	Institute: CENTRE FOR DEVELOPMENT OF ADVANCED COMPUTING MOHALI Course: SPECIALIZED TRAINING PROGRAMME IN HEALTHCARE TECHNOLOGY MANAGEMENT AND CLINICAL ENGINEERING Start Date: 10-07-2017 End Date: 04-08-2017	To present the following key healthcare technology management (htm) topics, providing relevant global best practices, to improve:~;~;htm infrastructure through appropriate healthcare technology policy~;~;how regulatory programs for medical devices can assist i m p l e m e n t a t i o n o f h t m programs.&Atilde;"~;~;healthcare technology r e l a t e d q u a l i t y , r i s k , a n d safety&atilde;"~;~;management of medical device technical service contracts&atilde;"~;~;healthcare technical services (hcts) ""~;~;~; clinical engineering capabilities at international level	ALL COUNTRIES	15 / 9	BHUTAN DEMOCRATIC REPUBLIC OF CONGO KENYA LIBERIA SUDAN TAJIKISTAN

28	Institute: REC INSTITUTE OF POWER MANAGEMENT & TRAINING Course: RURAL ELECTRIFICATION AND POWER MANAGEMENT Start Date: 10-07-2017 End Date: 01-09-2017	Aim: electricity is an indispensable requirement for all activities of human life. It has been recognized as a basic human need and a critical infrastructure on which the socio-economic development of an economy depends. Rural electrification is viewed as a prime mover for rural development and the basic pre-requisite for all industrial activities besides contributing significantly to increase agricultural productivity, creating employment and income generation. However, distribution of electricity to rural areas through grid connectivity is more complex by virtue of its nature as it involves high cost technical losses, besides, demand are very low and scattered. In these circumstances, decentralized generation and distribution is the convenient mode for supply of electricity to remote and far-flung rural areas. In recent times, attempt has been made to harness and manage the distribution of electricity at local level with people participation for adequate distribution at affordable prices. Objective: Familiarize participants with the experiences of rural electrification and distributed generation Impart knowledge on planning for rural electricity distribution management Discuss on different distributed generation options Orient towards the issues involved in decentralised generation and rural power distribution management	ALL COUNTRIES	20 / 21	AFGHANISTAN BANGLADESH BHUTAN ETHIOPIA KENYA MADAGASCAR MALAWI SOUTH SUDAN TANZANIA

64	Institute: REC INSTITUTE OF POWER MANAGEMENT & TRAINING Course: DESIGN, ERECTION, OPERATION, MAINTENANCE AND PROTECTION OF EHV SUBSTATIONS Start Date: 07-08-2017 End Date: 01-09-2017	Aim: with phenomenal growth in the power to be transferred, it has become essential to transmit power with least interruptions and minimum losses requiring to revise the transmission voltage levels from the present levels to 765 kv and above with optimum number of transformations, to ensure least possible losses. Ehv substations are the nerve centres of the transmission system by controlling and protecting the entire transmission network. The ehv sub-stations are essentially needed at load centers to facilitate transformation of power from ehv to voltages of utilization. Longer ac ehv lines have a tendency to carry lesser loads and cause problems of over voltages at the receiving ends on switching and during light loads, necessitating establishment of new switching stations sometimes. Of late, the regulators are also enforcing higher performance standards for transmission utilities to comply with. Penal provisions for non-compliance are in the offing. Efficient and economical design, erection and operation and maintenance procedures of substations without any compromise become paramount in providing reliable supply besides prolonging the life of equipment. Meeting this changing scenario, requires special skills on the part of the executives of the transmission sector to handle the system efficiently and economically and making it essential to undergo training programmes oriented towards subject Specific. Objective: Orientation towards the art technologies in the design	ALL COUNTRIES	20 / 19	AFGHANISTAN BHUTAN ETHIOPIA GHANA SOUTH SUDAN SUDAN TANZANIA ZIMBABWE

65	Institute: INTERNATIONAL MANAGEMENT INSTITUTE Course: CERTIFICATE COURSE IN STRATEGIC MANAGEMENT FOR EMERGING MARKETS Start Date: 07-08-2017 End Date: 02-09-2017	In this four weeks certificate course on strategic management for emerging markets the emphasis will be to provide an in- depth understanding of concepts, tools, and techniques for strategic management involving identification of external opportunities and internal strengths, making strategic choices, and allocation of resources. This course gives sufficient emphasis on development of global strategy to manage in the global economy as well as emerging markets. The course will also emphasize on sustainable development which rests on three fundamental pillars: economic growth, ecological balance, social progress. This course will introduce students to the role of ethics and social responsibility in various aspects of governance and decision-making. The course aims to provoke students to think critically about ethical behaviour in life and provides an overview of the kinds of challenges that global managers face while equipping them with the tools for managing the challenges in a responsible and effective manner. The objectives of this course are: -To provide understanding of the fundamental concepts of strategy formulation and strategy implementation -To provide understanding of unique characteristics of emerging markets with a focus on home grown emerging giants: challenges and opportunities faced as they go global -To gain insights into the key areas of ethics, corporate social responsibility and sustainable development with their increasing relevance in today world	ALL COUNTRIES	25 / 24	BHUTAN BOTSWANA EGYPT ETHIOPIA INDONESIA KAZAKHSTAN PALESTINE RUSSIA SRI LANKA SUDAN TAJIKISTAN TANZANIA TUNISIA UZBEKISTAN VIETNAM ZAMBIA ZIMBABWE

77	Institute: SOCIETY FOR DEVELOPMENT STUDIES Course: ELEVENTH ADVANCED HRD PROGRAMME ON NATIONAL AND MUNICIPAL FINANCE, EXPENDITURE MANAGEMENT & PERFORMANCE OUTCOMES, WITH PARTICULAR REFERENCE TO PROPOSED UN SUSTAINABLE DEVELOPMENT GOALS Start Date: 28-08-2017 End Date: 23-09-2017	Context of programme Inducting efficiency in management of development programmes has become a major challenge for local governments, especially in the context of rising cost and falling availability of development funds. Another dimension that has necessitated local governments to reconsider their existing policies and programmes is growing dissatisfaction of the people with the services provided. Assets have been created through substantial public investments but the outcomes are not evident to the people. The result has been the growing emergence all around of the scenario of a tale of two cities, a city within a city, a common characteristic of the urban world. Poverty, unemployment, slums, deprivation, continue to be seen across, and more specifically, within cities. In the rural areas, this was already a well established situation. Recognising these ground level realities, the united nations"&acirc;"&acirc;" has shifted its thrust from the output deliverables in its mdg programme to outcomes deliverables in the proposed sdg programme that will replace the mdgs in 2015. In this perspective, a reassessment of the approaches to local planning, financing and programme management has become critical. Bringing in outcomes of the programme activities is required, and with this recognition, the full process of governance has to be redesigned. As at present, there remains considerable uncertainty on the basic concept of an "&acirc;"&acirc;"outcome"&acirc;"&acirc;" of government programme. Is the outcome of the	ALL COUNTRIES	20 / 16	AFGHANISTAN ETHIOPIA FIJI PHILIPPINES SOUTH SUDAN SRI LANKA TAJIKISTAN ZIMBABWE

SI No	Course Details	Aim & Objective	Partner Countries	Max Seats / Utilized	Countries Participated
		education programme a high pass out rate or is it having access to a higher education stream or the employment market. Another issue is to assess the outcomes and transfer the results into the local planning, financing, budgeting and programme management system. Society for development studies (sds) has developed an outcome model for development planning, budgeting and programme management. This model is among the first of its kind and has received recognition of international organizations like world bank and imf. The sds approach will be a important component of the programme. Objectives The major objectives of the 4 weeks programme is to: "&Acirc;&cent;familiarize policy and decision makers in national and sub-national governments with concepts and practices required to induct efficiency, improve productivity and attain outcomes at the sub- national level. "&Acirc;&cent; develop capability to direct outcome oriented planning for strengthening local governance "&Acirc;&cent;adopt innovative financing strategies "&Acirc;&cent;introduce outcome-oriented expenditure planning, budgeting and management "&Acirc;&cent;undertake o&m and asset rejuvenation of critical service delivery assets "&Acirc;&cent;design outcome-oriented monitoring & evaluation system for outcome oriented planning and budgetary process in municipal management

		Outcomes "&Acirc;&cent; informed group of officials, capable f of designing and managing sub-national programmes on principles of local resources, participatory process and full utilization of local service delivery and assets for attaining outcomes of the development agenda. "&Acirc;&cent; professional capacity for efficient mobilization and management of municipal resources "&Acirc;&cent; capacity to lead the process of shifting to new outcome-oriented process of municipal planning and budgeting.

95	Institute: NATIONAL INSTITUTE FOR MICRO SMALL & MEDIUM ENTERPRISES Course: CAPACITY BUILDING FOR PROVIDING ALTERNATIVE LIVELIHOOD OPPORTUNITIES FOR POOR (CBALO) Start Date: 04-09-2017 End Date: 27-10-2017	With the changes that are taking place in the external world, there has been a paradigm shift in the job/livelihood market. Poverty is no longer a rural phenomenon and increasingly we find attention being focused on urban poor who are often the migrants. One also notices an increasing shift from agriculture to manufacturing and services sector. It is expected that traditional sources such as agriculture will have limited potential to generate new livelihoods. Promoting livelihood in such a situation remains a challenge. Developing countries needs to generate livelihood opportunities to sustain its economy. To impart knowledge in self help group concept Develop skills in identifying livelihood opportunities for poor To impart knowledge on role micro finance institutions in empowering poor through providing credit To gain insight in understanding challenges and opportunities faced in providing livelihood opportunities Develop skills in managing livelihood projects Develop skills in resource mobilization for livelihood initiatives. 123	Institute: REC INSTITUTE OF POWER MANAGEMENT & TRAINING Course: PLANNING AND MANAGEMENT OF POWER TRANSMISSION AND DISTRIBUTION SYSTEMS Start Date: 18-09-2017 End Date: 10-11-2017	Aim: power is a vital infrastructure for economic development. It is most capital intensive infrastructure. Accelerating economic growth and achieving higher standards of living depend upon the availability of adequate and reliable power at an affordable price. To make power sector commercially sound and self-sustaining, efficient transmission and distribution management systems and adoption of modern technologies are fundamental. Obsolescence in design, construction practices and technologies, inadequate interregional transmission links will lead to poor quality, unreliable power supply, and high energy losses Inter regional imbalances. It has become, utmost important to review the existing practices technologies adopted to optimize and modernize them, so as to supply electricity at affordable cost to all categories of consumers to help bolster economic growth. Objective: 1.Impart knowledge on operation 2. Maintenance of power transmission distribution systems. 3.Orient the participants with the latest technologies, methods and equipment including it applications in power transmission. 4. Distribution system design 5. Discuss about the commercial aspects of power transmission 5. 124	Institute: REC INSTITUTE OF POWER MANAGEMENT & TRAINING Course: POWER PROJECT APPRAISAL, FINANCIAL MANAGEMENT AND ACCOUNTING STANDARDS Start Date: 18-09-2017 End Date: 10-11-2017	Aim The fundamental issue of power sector is the paucity of funds for capital intensive power projects. The generation, transmission and distribution projects require capital and talented project engineers, planners and finance managers to keep pace with development. As financing is one the basic inputs for any capital intensive project and is complex in nature, the source of financing both short term and long term, need to be planned thoroughly and systematically. The cost of capital and consequently the necessity of learning the techniques of project formulation and viability on technical, financial and economic fronts have become crucial for the success of the projects. Transparency, efficiency and economy being three important factors in the operation of any company, finance and accounts will act as a tool for transparency. Ultimately, finance and accounting is the language of economic activity and in that power distribution is no exception. Therefore, a dynamic power company requires a vibrant and innovative financing and accounting system followed by unbiased audit. Objective &Atilde;'&acirc;"&acirc;&sect;familiarize the participants with the institutional framework for sources and methods of financing of power companies &Atilde;'&acirc;"&acirc;&sect;equip the participants on project formulation, financial appraisal and monitoring of power projects &Atilde;'&acirc;"&acirc;&sect;impart knowledge on	ALL COUNTRIES	25 / 14	AFGHANISTAN COTE D'IVOIRE EGYPT ETHIOPIA OMAN PHILIPPINES SOUTH SUDAN TANZANIA ZIMBABWE

135	Institute: V.V.GIRI NATIONAL LABOUR INSTITUTE Course: ENHANCING LEADERSHIP SKILLS Start Date: 03-10-2017 End Date: 20-10-2017	From time immemorial, leadership by different leaders has been exhibited in society. The human civilization and its development were designed by the then leaders in its every phase. But to survive in the present century we need a new generation of leaders and not managers. Events of far reaching consequences are reshaping and defining a new social, political and economic purpose across the world. In this scenario, there is a strong need to develop ability in leaders so that they can influence individuals or groups to think, feel and take positive action to achieve goals. Leadership at self and organizational levels has been widely researched over the years. The emphasis which was based on trait leadership has shifted to situational leadership. Thus, emerged a composite concept of leadership which includes all aspects of leading-traits, roles and individuals in the context of a situation. All these determine whether the leadership is functional or dysfunctional. Leadership is not only relevant to organizational life, it applies to all aspects of our life. The strategic life leadership means that one develops a vision and direction for one's life, identifying personal core values and fostering an informal team working amongst one's colleagues and associates. The administrators and executives need to understand these changes and analyze their implications to serve	ALL COUNTRIES	30 / 30	AFGHANISTAN ARGENTINA ARMENIA BHUTAN BOTSWANA EGYPT ETHIOPIA FIJI HONDURAS INDONESIA IRAQ KENYA MALAWI MAURITIUS NIGER NIGERIA OMAN SOUTH SUDAN SRI LANKA TAJIKISTAN UZBEKISTAN ZAMBIA

136	Institute: NATIONAL INSTITUTE OF RURAL DEVELOPMENT Course: COMMUNITY DRIVEN RURAL DEVELOPMENT Start Date: 04-10-2017 End Date: 31-10-2017	Programme aims Rural management is the operation of the rural sector as a system. The management system needs to grasp and conceive. It is concerned with the transformation of the rural society. While professionalization and inculcation of management skills are important, it is equally necessary to sensitize the development professionals, administrators, and managers, creating in them an awareness of the major task of their bringing about rural transformation through people-centered, people-controlled, and community-driven participatory rural development projects. Therefore, the programme seeks to: ""&Acirc;&cent;provide participants with a core professional training which integrates the study of rural development management using participatory approaches ""&Acirc;&cent;offer a range of advanced courses addressing key policy and management issues in rural development; ""&Acirc;&cent;develop and enhance participants research skills in using participatory methods in project identification, project planning, implementation, monitoring and evaluation, method and models of community mobilization; and ""&Acirc;&cent;equip participants with analytical and planning skills relevant to employment as policy-makers, planners and managers working on rural	ALL COUNTRIES	25 / 19	AFGHANISTAN ETHIOPIA GUYANA MALAWI MALI MAURITIUS NAMIBIA NIGER PHILIPPINES SRI LANKA TANZANIA VIETNAM ZIMBABWE

177	Institute: V.V.GIRI NATIONAL LABOUR INSTITUTE Course: LABOUR AND EMPLOYMENT RELATIONS IN A GLOBAL ECONOMY Start Date: 06-11-2017 End Date: 24-11-2017	Of the different implications of the current phase of globalization, those pertaining to labour market and employment relations assume paramount importance. It is now evident that the labour market outcomes of globalisation have not been uniformly beneficial or socially inclusive. In majority of the countries, growth of employment has not matched the growth of output. More and more employment is being generated in informal sector characterized by poor working conditions and lack of effective social protection. There are also massive transformations that are taking place in the context of employment relations. The employment relation system is becoming increasingly decentralized. Rapid flow of technology is considerably altering production structures and work organization. It is important that social partners and academics, especially those dealing with social and economic policies, have a clear understanding on the nature and characteristics of the emerging labour market and employment relations in a global economy. This is critical from the perspective of formulating employment policies, which will be conducive for generation of productive and decent jobs. Accelerated pace of transformations in the world of work also demand that the administrators enhance their leadership and motivational skills to influence different social partners to respond to the challenges of change. There is also an urgent need that the major changes introduced in labour and social policies to respond to the challenges of globalization and their effects in different countries are also shared and discussed. 178	Institute: ARUN JAITLEY NATIONAL INSTITUTE OF FINANCIAL MANAGEMENT Course: PROJECT & RISK MANAGEMENT Start Date: 06-11-2017 End Date: 24-11-2017	Building on the principles of economics, finance, insurance, psychology and decision sciences, this programme aims to develop an integrated view of the different risks faced by an organization. Through a critical examination of theory, research and best practices, you will develop a knowledge and understanding of how to measure and manage a number of risks and how to implement and contribute to an integrated risk management strategy within an organization. Operating managers, in order to be effective and result oriented should be finance savvy, able to understand and present, drive and measure business plans in terms of financial figures and communicate in a common 'business language' through financial figures. Introductory programme on finance can be instrumental to enhance the profile of operating managers. Finance cuts cross levels and businesses and has unifying influence. Further, operating managers need to be equipped with a financial decision making tool kit which helps them to identify businesses to get into, take pricing decisions, decide on the product mix, identify areas for cost reduction and take a make or buy decisions. This program aims to meet the requirements of operating managers in different functional areas who would like to be well versed with the introductory nuances of finance. 217	Institute: V.V.GIRI NATIONAL LABOUR INSTITUTE Course: GENDER ISSUES IN THE WORLD OF WORK Start Date: 04-12-2017 End Date: 22-12-2017	Inclusive growth of the nation depends upon the optimal utilization of its resources. Investment in human resource is considered to be promoting gender equity. World over, the roles and responsibilities assumed by society pushes the weaker section in hands of discrimination. Considering the patriarchal mindset women tend to suffer most. This mind set is being reflected in the world of work. I.L.O initiatives in reducing the gender gaps are guiding towards mainstreaming the existing gender issues. Nowadays gender issues are part of policy discussions. Nations are recognizing the neglected gender issues and taking the steps to minimize the same in the existing environment. Access to quality education, decent jobs, sharing of family responsibilities will accelerate the swiftness in the direction of more humanitarian development. Effective implementation of existing laws, developing humane mindset requires haves for haves-not campaign. Implementation of affirmative policies will definitely change the individual mindset and behavior in the world of work and this will be positively reflected in the behavior of individuals in the family, community, society, nation and universe. It is in this context, that the v.V. Giri national labour	ALL COUNTRIES	30 / 31	AFGHANISTAN ARMENIA BELARUS BURUNDI ETHIOPIA FIJI HONDURAS KYRGYZSTAN NIGERIA PHILIPPINES SIERRA LEONE SOUTH SUDAN SRI LANKA TAJIKISTAN TANZANIA UGANDA UZBEKISTAN VIETNAM ZAMBIA

248	Institute: V.V.GIRI NATIONAL LABOUR INSTITUTE Course: SOCIAL PROTECTION IN A GLOBALISED ECONOMY Start Date: 08-01-2018 End Date: 25-01-2018	Social security measures have been an essential aspect of any society. However, the forms of security and the process of implementation have been different in different times and places. The objective of providing social security has remained the same despite the differences: to provide some forms of assistance to any member of a society during some period of distress "and distress caused by any unforeseen and inevitable eventualities like sickness, accident, unemployment, death, etc. Today state plays a very important role in providing social security to people in different forms with different terms and conditions. Nonetheless, the security measures could be broadly divided into two categories: namely, (i) security measures which are provided by the state with partial contributions from the beneficiaries; and (ii) security measures that are provided solely by the state to the beneficiaries without any corresponding contributions. Despite the overwhelming number of the working population, the provision of social security has remained virtually conspicuous by its absence in the lives of the great majority of the workers of the unorganized sector. Though it is a demand of our time, that social security is an important need for the unorganized sector workers, yet not much has been done. Keeping these issues in view the present programme has been designed Objectives "and to acquaint with concepts of social security	ALL COUNTRIES	30 / 12	AFGHANISTAN BANGLADESH BHUTAN BOTSWANA ETHIOPIA LESOTHO MAURITIUS PHILIPPINES TANZANIA TURKMENISTAN

270	Institute: NATIONAL INSTITUTE FOR MICRO SMALL & MEDIUM ENTERPRISES Course: INTELLECTUAL PROPERTY MANAGEMENT STRATEGIES FOR SMES (IPMSS) Start Date: 22-01-2018 End Date: 16-03-2018	Aim: In recent years, intellectual property rights (ipr) management has become increasingly important, both for large & small and medium-sized enterprises. The main categories of intellectual property rights include: patents, copyright, trademarks, gi, design rights, etc. Ipr provides incentive for creativity and the disclosure of information and plays a significant role in encouraging innovations in the form of product/process development leading to technical advancement. The intellectual property system is also useful to universities and r&d organizations first as a source of information from where further knowledge can be created and can be used to plan for further studies in the area of concern and as literature conveying recent discoveries and general information of interest. Secondly, it can be used as a source for products and services when their industrial or commercial exploitation is used for social, cultural or economic gains. In the view, management of intellectual property rights at large & small and medium-sized enterprises, universities and r&d organizations is very important in the light of present globalization and liberalization of economies all around the world. The programme is intended to discuss different aspects of ipr and how to develop ip strategy and integrate it in the sme business plans. Also, case studies, wherever necessary would be considered to better elaborate the perspective. 293	Institute: V.V.GIRI NATIONAL LABOUR INSTITUTE Course: RESEARCH METHODS IN LABOUR STUDIES Start Date: 05-02-2018 End Date: 23-02-2018	Increasing economic independence of nations that marks the current phase of globalisation has had very strong yet ambiguous impact on the world of work. It is now evident that the outcomes of globalisation have not been uniformly beneficial or socially inclusive. Since employment is the central mechanism through which the expected benefits of globalization can reach and include the widest section of the world's poor, provision of quality employment at an increased pace is the surest countermeasure against the growing exclusion and deprivation. In such a context, undertaking appropriate and scientific research to delineate and appraise the emerging issues related to labour and employment assumes paramount importance especially from the perspective of evolving sustainable and pragmatic policy options aimed at improving the labour market outcomes. It is also necessary that such research be grounded on strong methodological framework and analytical techniques. It is in this context that the v.V.Giri national labour institute is organizing an international course on research methods in labour studies. Objectives - understand various concepts and theories related to labour; - provide an overview of the labour scenario of the world in general and developing countries in particular; - obtain deeper understanding of	ALL COUNTRIES	30 / 11	AFGHANISTAN AZERBAIJAN BANGLADESH CHILE ETHIOPIA MAURITIUS THAILAND UZBEKISTAN VIETNAM ZAMBIA

313	Institute: NATIONAL INSTITUTE FOR MICRO SMALL & MEDIUM ENTERPRISES Course: CAPACITY BUILDING FOR PROVIDING ALTERNATIVE LIVELIHOOD OPPORTUNITIES FOR POOR (CBALO) Start Date: 19-02-2018 End Date: 16-03-2018	Aim: With the changes that are taking place in the external world, there has been a paradigm shift in the job/livelihood market. Poverty is no longer a rural phenomenon and increasingly we find attention being focused on urban poor who are often the migrants. One also notices an increasing shift from agriculture to manufacturing and services sector. It is expected that traditional sources such as agriculture will have limited potential to generate new livelihoods. Promoting livelihood in such a situation remains a challenge. Developing countries needs to generate livelihood opportunities to sustain its economy. Objectives: . To impart knowledge in self help group concept . Develop skills in identifying livelihood opportunities for poor . To impart knowledge on role micro finance institutions in empowering poor through providing credit . To gain insight in understanding challenges and opportunities faced in providing livelihood opportunities . Develop skills in managing livelihood projects . Develop skills in resource mobilization for livelihood initiatives.	AFGHANISTAN	25 / 23	AFGHANISTAN

325	Institute: V.V.GIRI NATIONAL LABOUR INSTITUTE Course: HEALTH SECURITY AND PROTECTION OF WORKERS Start Date: 05-03-2018 End Date: 23-03-2018	Globalisation has led to increasing informalisation of work in the developing countries, whereby workers have less access to social protection. On the one hand flexible, precarious and insecure forms of work with greater health risks have increased. On the other hand, safety and protection systems designed for formal workplaces and workers are often inaccessible to informal workers. Moreover, in many developing countries, governments have been compelled to limit welfare programmes including health services through public expenditure. This has increased health insecurities and vulnerability for majority of the workers in the developing countries. It is in this context that the present course has been designed. The present training programme therefore enables the participants "•;"•;"&Iuml;"•;"&sect;to identify the growing health risks and insecurities of workers. &Iuml;"•;"&sect;to understand the issue of health protection and promotion at workplace. &Iuml;"•;"&sect;to understand the impact of changes in the health care system and health financing. &Iuml;"•;"&sect;understand the need for universal health coverage. 341	Institute: CENTRE FOR DEVELOPMENT OF ADVANCED COMPUTING MOHALI Course: SPECIALIZED TRAINING PROGRAMME IN CADD ENGINEERING Start Date: 19-03-2018 End Date: 08-06-2018	Cadd all over the world, especially in the developing countries, computer aided drafting and designing is making a tremendous impact in the field of designing. Cadd has emerged as the most potent it tool for companies to generate mechanical designs, accurately, cost effectively and with speed. The biggest contribution of computers to the design process is the process of creating a 3d- model of a design that can be subjected to computer-based testing. Presentation programs rendering models and animation in 3d form a large part of selling and advertising in today's competitive market. The main objectives of this programme are to enable the participants to: 1. Produce detailed and accurate 2d or 3d view of the models. 2. Create and interpret working drawings of the models using cadd. 3. Learn technical sketching techniques, creating layouts. Dimensioning, surface 4. Modeling, assembly and animations.
