ITEC- 2022- 2023

Training Programme in Cyber Security & Malware Analytics, Reverse Engineering for Officials of the Republic of Iraq

A.	Name of the Institute	Centre for Development of Advanced Computing, Mohali
B.	Name/Title of the Course	Training Programme in Cyber Security & Malware Analytics, Reverse Engineering for Officials of the Republic of Iraq
C.	Proposed Dates and Duration of the Course in weeks/ months	17th October, 2022 – 11th November, 2022 Duration: Four week(s)
D.	Eligibility Criteria for Participants	
	1. Educational Qualification	Technical Graduate (Computer Science/ Electronics/Telecommunications/or equivalent) with working knowledge of computers.
	2. Work Experience	As per MEA guidelines
	3. Age Limit	As per MEA guidelines
	4. Target group (Level of participants and target ministry/department etc. may be identified)	Working Professional with knowledge of computers.
E.	Aims & Objectives of the Course	At the end of the course, Students will be able: • To understand the Cyber Security concepts & terminology. • To understand different types of Cyber Attacks and their impacts. • To prevent attacks and other threats in a network or Internetwork. • To understand about vulnerabilities in existing networking infrastructure • Hands on practical packet analysis. • To facilitate network security using security methods. • Cyber Security Analytics
F.	Details / Content of the Course	**1) Introduction to Computer Networks & Linux** • Introduction to Networking with Lab • OSI Model, TCP/IP Headers, IP Protocol and Addressing • Basic Network Devices & Their functionality • Routing process and Routing tables with Lab, Access Control lists • System Administration tools • Linux Fundamentals and Commands, iptables

		• Network Designing, Configuring and Administration
		2) Cyber Security Attacks
		• Cyber Security Overview
		• Introduction to Cyber Attacks
		• Impact of Cyber Attacks
		• Types of Cyber Attacks
		  ○ Layer-2 Threats: MITM, ARP Poising, Spoofing etc.
		  ○ Malwares
		  ○ Password Attacks
		  ○ DDoS Attacks (Distributed Denial of Service Attacks)
		  ○ Pop-Ups
		  ○ Software Updates
		  ○ Public Unsecured Wi-Fi Network Attacks
		  ○ Phishing Scams
		  ○ Man-in-Middle Attacks
		  ○ Eavesdropping
		  ○ Social Engineering
		• Application Security Attacks
		  ○ Injection (SQL Injection)
		  ○ Broken Authentication and session management
		  ○ Cross Site Scripting
		  ○ Broken Access Control
		  ○ Security Misconfigurations
		  ○ Cross Site Request Forgery (CSRF)
		• Cyber Security Methods
		  ○ Perimeter Security Fundamentals
		  ○ Network Monitoring
		  ○ PCAP (Packet) Capturing
		  ○ Antivirus and Firewalls
		  ○ Intrusion Detection/Prevention System (IDS/IPS)
		  ○ Honeypots/Honeynets
		  ○ Vulnerability Assessment
		  ○ Attacks (Test Cases)
		3) Malware Analytics
		• Introduction to malware analysis
		• Malware Analysis a practical approach
		• Malware analysis techniques- Dynamic and

		static analysis
		• Basic analysis
		  ○ Basic static analysis
		  ○ Malware analysis in virtual machines
		  ○ Setup a safe virtual environment to analyse malware
		  ○ Basic Dynamic analysis
		• Advanced static analysis
		  ○ Buffer overflow analysis using immunity debugger
		  ○ IDA Pro
		4) Malware Reverse Engineer
		• In-depth Malware Analysis
		  ○ Reverse engineer malware and learn methods for malware analysis
		  ○ Performing static and dynamic code analysis of malicious Windows executables
		  ○ Set up a safe virtual environment to analyze malware
		  ○ Use key analysis tools like IDA Pro, OllyDbg, and WinDbg
		• Advanced dynamic analysis
		  ○ Debugging, malware functionality
		  ○ Malware behavior
		  ○ Signature generation

G.	Mode of Evaluation of Performance of the ITEC Participant	Theory, viva voce & Practical
