Capacity Building Program

“Advanced Psychological Methods of Investigation A Way Ahead”

Introduction:

This program goes beyond the confines of established practices in the field of psychological investigation. It significantly shifts the landscape of current investigation methods. The way we try to prevent crime needs to change with the times as well.

Only psychological methods of investigation serve to connect the dots, either to prove the innocence or involvement of the suspect, accused, or witnesses when all other specialists are unable to comprehend or grasp the situation.

The way forward to the latest developments of advanced psychological procedures in inquiry and investigations. Our goal is to investigate innovative instruments, methods, and approaches that take us beyond standard procedures.

To address these issues, Rashtriya Raksha University (RRU), School of Behavioural Sciences & Forensic Investigation (SBSFI) offers a thorough training program that is a life-changing experience that gives people the power to influence investigative education.

The training program is a dynamic response to the way crime is changing and the urgent need for qualified individuals with competence in criminal profiling, behavioral analysis, and state-of-the-art profiling.

Aim and Objectives:

- To provide a platform for sharing the latest advancements in investigative psychology.
- To enhance the skills and knowledge of professionals in the application of advanced psychological methods.
- To foster collaboration and networking among experts, researchers, and practitioners in the field.
- To discuss ethical considerations and best practices in the use of advanced psychological investigative techniques.

School of Behavioural Sciences and Forensic Investigations

Rashtriya Raksha University

An Institution of National Importance

Ministry of Home Affairs, Government of India

Lavad, Gandhinagar, Gujarat 382305 India.

Topics:
